

VITOK-SIGTRAN

Decoding SIGTRAN format data streams, coming from telecom operators' switching equipment.

WORKING WITH SIGTRAN:

- Processing the data, coming from the transmission channel in the SIGTRAN protocol format;
- Customizing the types of fields to be extracted from the Sigtran stream (LAC, Cell, Number A, Number B, StartTime and others);
- Retrieval of different types of calls (answered, not answered), and also information about the change of location of the subscriber.
